Data Security

**Sinvidian**

[contacto@sinvidian.es](mailto:contacto@sinvidian.es)

## CHARACTERISTICS

- ✓ The service is based on reviews of the maturity of systems and between systems, study of roles and their risks.
- ✓ It is necessary to have security in the systems that are calling and connecting with the outside like webdispatchers, portals, saprouters, ...
- ✓ It validates the operation of SAP, an exhaustive study of the vulnerabilities of the systems (Servers, architecture ...), compliance with SAP Best Practices

## BENEFITS

- ✓ Comprehensive study of SAP systems.
- ✓ Reduction of external and internal attacks on information within SAP systems.
- ✓ Specific reports of studies.
- ✓ No SAP GRC is required to perform role segregation and role mitigation.
